

# Liquidline Q5

## Bean to Cup Coffee Machine

A high-volume, dual-bean, automated coffee machine that offers users both quality and variety. Easy to use, manage and maintain, the Liquidline Q5 is a prime choice for busy commercial locations.

# Liquidline

## Q5

---

Experience the remarkable Liquidline Q5, a dual bean-to-cup coffee machine that delivers consistently delicious espresso-based beverages cup after cup. With a wide variety of coffee shop favourites, from classic Italian espresso to creamy lattes, as well as chocolate and hot water for tea, the Liquidline Q5 is a real crowd pleaser.

---

### DUAL BEANS HOPPERS

With two bean hoppers, you can offer two separate coffee blends, ensuring lovers of both dark and light roast blends are catered to. Each hopper has its own corresponding adjustable grinder, which our Engineers will calibrate to get the optimum flavour from each blend.

### USER FRIENDLY INTERFACE

Select your drink from the elegant integrated glass interface. With Distance Selection technology, you needn't touch the surface of the machine, simply hover your finger above the surface of the screen.

### EFFORTLESS MAINTENANCE

The Liquidline Q5 is exceptionally easy to manage and maintain. The top and front mounted hoppers are conveniently positioned for refilling, the drip tray and waste drawers are easily removed for cleaning, and the stainless-steel dispensing area is sturdy and simple to clean.

### EYE CATCHING DESIGN

Crafted from quality materials, stainless steel and frosted glass with LED lighting, the premium design of the Liquidline Q5 looks at home in any modern workplace.

“

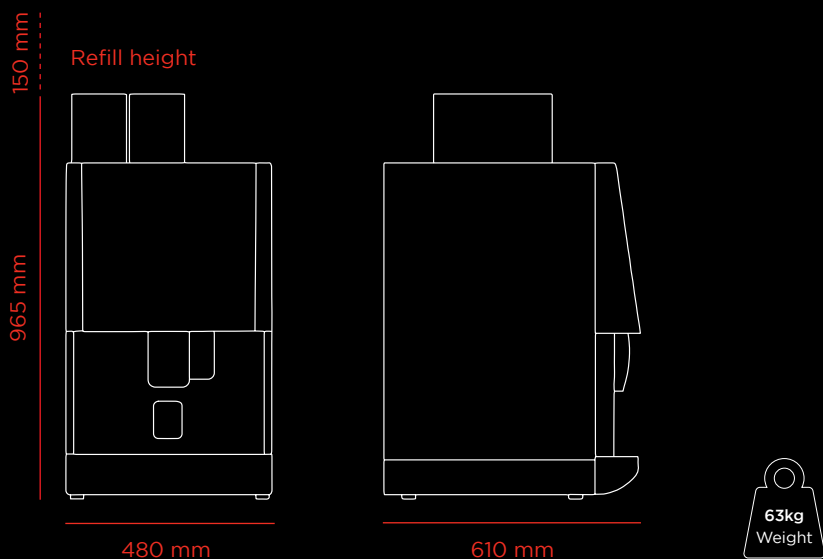

With two bean hoppers, you can offer two separate coffee blends, ensuring lovers of both dark and light roast blends are catered to.”
