

Schaerer Coffee Club

Bean to Cup Coffee Machine

Small, convenient and highly efficient, the Schaerer Coffee Club is a compact yet powerful solution for offering premium beverages crafted with fresh milk. With a wide menu of drinks, easy to use interface and guided maintenance, the Schaerer Club will be the star of your office kitchenette, co-working space or breakout area.

Schaerer Coffee Club

Our most compact fresh milk coffee solution and designed for an average output of 80 cups per day, the Schaerer Club is small but mighty. From your first espresso in the morning, to a warming hot chocolate at the end of the day, this superior bean to cup machine will both energize your team and excite your customers.

SIMPLE USER INTERFACE

The integrated 7" touchscreen display ensures simple ordering. Place your cup on the drip tray, swipe the screen to browse the menu, then select your favourite drink. The animated display will show the preparation status as the Schaerer Club grinds, brews, foams and dispenses your chosen beverage.

MULTIPLE MILK OPTIONS

Whilst most customers opt for fresh milk for its superior taste and texture, there is also a powdered milk option for those looking for a lower-maintenance, long-life drinks solution.

MOBILE APP

For spaces where hygiene is paramount such as healthcare settings, users can order drinks from the Club using the Schaerer mobile app. As well as touchless ordering, you can customise drinks and save your favourite combinations.

GUIDED CLEANING & MAINTENANCE

Cleaning and maintenance messages are displayed on screen when required, with the on-screen animations guiding users through each process. From refilling your bean hoppers, to a daily rinse and a more comprehensive weekly clean, the Schaerer Club takes you through the whole process step-by-step.
