

LIQUIDLINE®

Vitro S1

Bean to Cup
Coffee Machine

A high performing, compact coffee machine designed to provide the highest quality of espresso.

The Vitro S1 can create espresso based drinks in any location that consumes less than 60 cups per day and is ideal for the office environment. The S series is the most versatile when you are talking about the diversity of coffee serving and preparation.

Make first impressions count with the Vitro S1 and earn your employee's trust and loyalty, serving the drinks they want 24/7. This is the ultimate space saving machine that will deliver results every time.
